

To Whom It May Concern,

You may be a nurse educator, education coordinator, or other manager responsible for employee compliance in mandated BLS, CPR, AED or First Aid. We understand that it is your responsibility to audit and ensure the quality and accreditation of employee certification. We also understand that you may not be familiar with The World Institute of Safety or the courses that we offer. Our students receive the highest standard of education.

Our classes follow the most up to date ECC/ILCOR standards and our curriculum meets or exceeds the American Heart Association (AHA) recommended guidelines. Our training is equivalent to the AHA's certification courses. We fulfill the requirements for education for entities such as the Joint Commission, OSHA, and Medicare. All of our classes include a practical skills evaluation with a live instructor.

Basic Life Support for Healthcare Providers

This expert-level program helps keep healthcare professionals prepared and ready to respond as they encounter life-threatening emergencies, provide basic life support and respond to choking incidents.

COURSE TOPICS

Recognizing an Emergency
